

# Асоціація України з ЄС та міжнародне співробітництво: чи це справді важливо?

## Conditions for licensing:

### You have completed a qualification in a country that is not an EU/EEA Member State

- Medical training for a medical doctor's profession completed abroad that fulfils certain criteria
- Sufficient language skills
- At least six months of internship at a Finnish hospital or health centre maintained by a public body (central government, municipality, joint municipal authority)
- Three-part examination

**...m. Tenttipaikka ei ole vaihtunut, mutta aiemman Lääkärinkadun nimi on nyt Arvo Ylpön katu.**

Kaikkina ilmoitettuina päivinä voi tenttiä sekä kliinistä kuulustelua että suomalaisen terveydenhuollon kuulustelua.

Potilastenttien aikataulut sovitaan tentaattoreina toimivien terveyskeskuslääkärien tai yliopiston kliinisten opettajien kanssa.

**Kuulustelujen hinnat ovat muuttuneet 1.6.2015 alkaen:**

- **Kliininen kuulustelu 500 euroa**
- **Suomalaisen terveydenhuollon kuulustelu (2-3 osaa) 500 euroa**
- **Suomalaisen terveydenhuollon uusintakuulustelu (1 osa) 250 euroa**
- **Käytännön potilastentti 1400 euroa**

Valtioneuvoston asetus yliopistojen toiminnassa perittävistä maksuista annetun valtioneuvoston asetuksen 4§:n muuttamisesta (1.5.2015)

## Vivostat® Fibrin Sealant

A revolution in fibrin sealant technology

**Contents:**  
2 Absorbable Fibrin Sealant Patches  
Human Fibrinogen: 55.5 mg/ml (8.6 mg/cm<sup>2</sup>)  
Human Thrombin: 241.9 Units/ml (37.5 Units/cm<sup>2</sup>)  
Oxidized Regenerated Cellulose, Polyglactin 910  
For dosage and inactive ingredients,  
see Prescribing Information.  
No U.S. standard of potency  
Contains no preservative  
**Rx Only**

Topical  
Single

EVICEL™  
Fibrin Sealant (Human)

## EVICEL™ Fibrin Sealant (Human)

## TachoSil® Fibrin Sealant Patch

- Forms an elastic clot that anchors firmly to the bleeding site<sup>2</sup>
- Sprays or drips for broad or targeted application<sup>1</sup>
- 5 mL provides 100 cm<sup>2</sup> coverage area<sup>1</sup>
- Provides clear visibility of the bleeding site so you can quickly assess hemostasis<sup>2</sup>
- EVICEL™ maintains clot stability over time comparable to other fibrin sealants, without the need for an antifibrinolytic

## RAPLIXA® (Fibrin sealant (human)) for topical use

## Фібриновий клей як альтернатива хірургічним швах

Фахівці з пластичної хірургії придумали, яким чином можна скоротити післяопераційний період до одного тижня замість шести: вони замінили шви на високотехнологічний клей. Фібриновий клей прискорює процес загоєння ран і скорочує рубці. Часто батьки малюків застосовують для загоєння ранок біологічний клей, який має бактерицидну і загоює діями. Не так давно аналогічну ідею почали використовувати в косметичній хірургії століття, як альтернативу хірургічним швах. “Фібриновий клей почав широко розповсюджуватися в нейрохірургії. Але це досить дорогий продукт, і тому його застосування має бути обґрунтоване”, - каже лицьовій пластичний хірург Джуліан де Сільва. "Після п'ятирічного дослідження на цю тему,

проаналізувавши отримані дані, я зробив висновок, що розчин не тільки за короткий час склеює тканини, але і скорочує післяопераційний період. Пацієнти виписувалися всього через тиждень після операції на відміну від шести тижнів при накладенні швів”, - ділиться пластичний хірург.

# Vivostat

(аутогенно збагачений тромбоцитами фібрин та  
фібриновий клей )

# Vivostat PRF<sup>®</sup> in burns

**For decades fibrin sealant has been used for burns as a scaffold for re-epithelialization. Vivostat PRF<sup>®</sup> provides this scaffold and combines it with a high concentration of platelets relevant for tissue regeneration. Moreover, it offers the surgeon the opportunity to co-deliver skin cells/stem cells with the Vivostat PRF<sup>®</sup> solution.**

The high concentration of fibrin found in Vivostat PRF<sup>®</sup>, furthermore, acts as a glue enabling the surgeon to use Vivostat PRF<sup>®</sup> for graft fixations. Using Vivostat PRF<sup>®</sup> to fixate the graft allows the surgeon to use less staples or none at all depending on the location of the burn. The fibrin also acts as a haemostatic reducing the risk of haematoma formation, which may cause graft loss. Any remaining Vivostat PRF<sup>®</sup> can be applied to the graft harvest site to speed up tissue regeneration and reduce pain for the patient.

# Selante de Fibrina

**Estudo Selante: uso exclusivo em  
ensaio clínico**

Uso tópico

Manter armazenado entre -18 e -22°C

Utilizar em temperatura ambiente (15 a 30°C)

Contém 3 frascos - 1 dose

[Motor recovery and synaptic preservation after ventral root avulsion and repair with a fibrin sealant derived from snake venom.](#) Barbizan R, Castro MV, Rodrigues AC, Barraviera B, Ferreira RS, Oliveira AL. PLoS One. 2013 May 7;8(5):e63260.

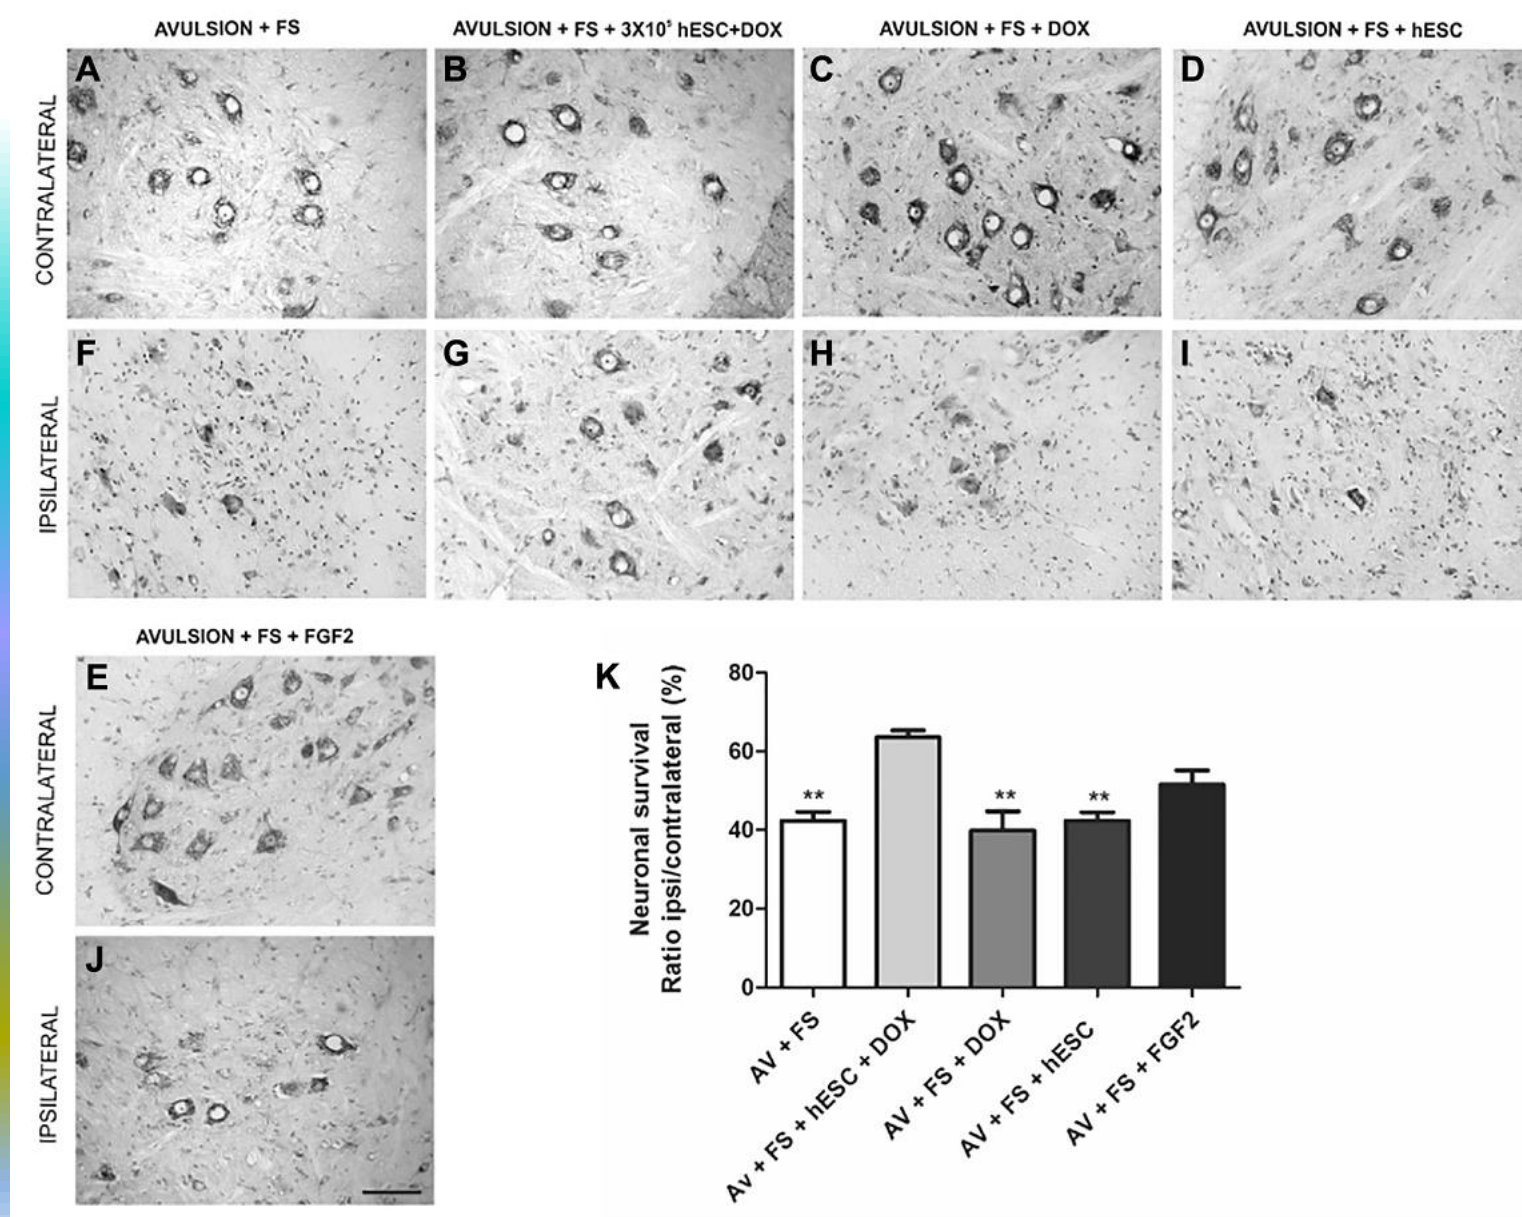

## Supplementary figures and legends

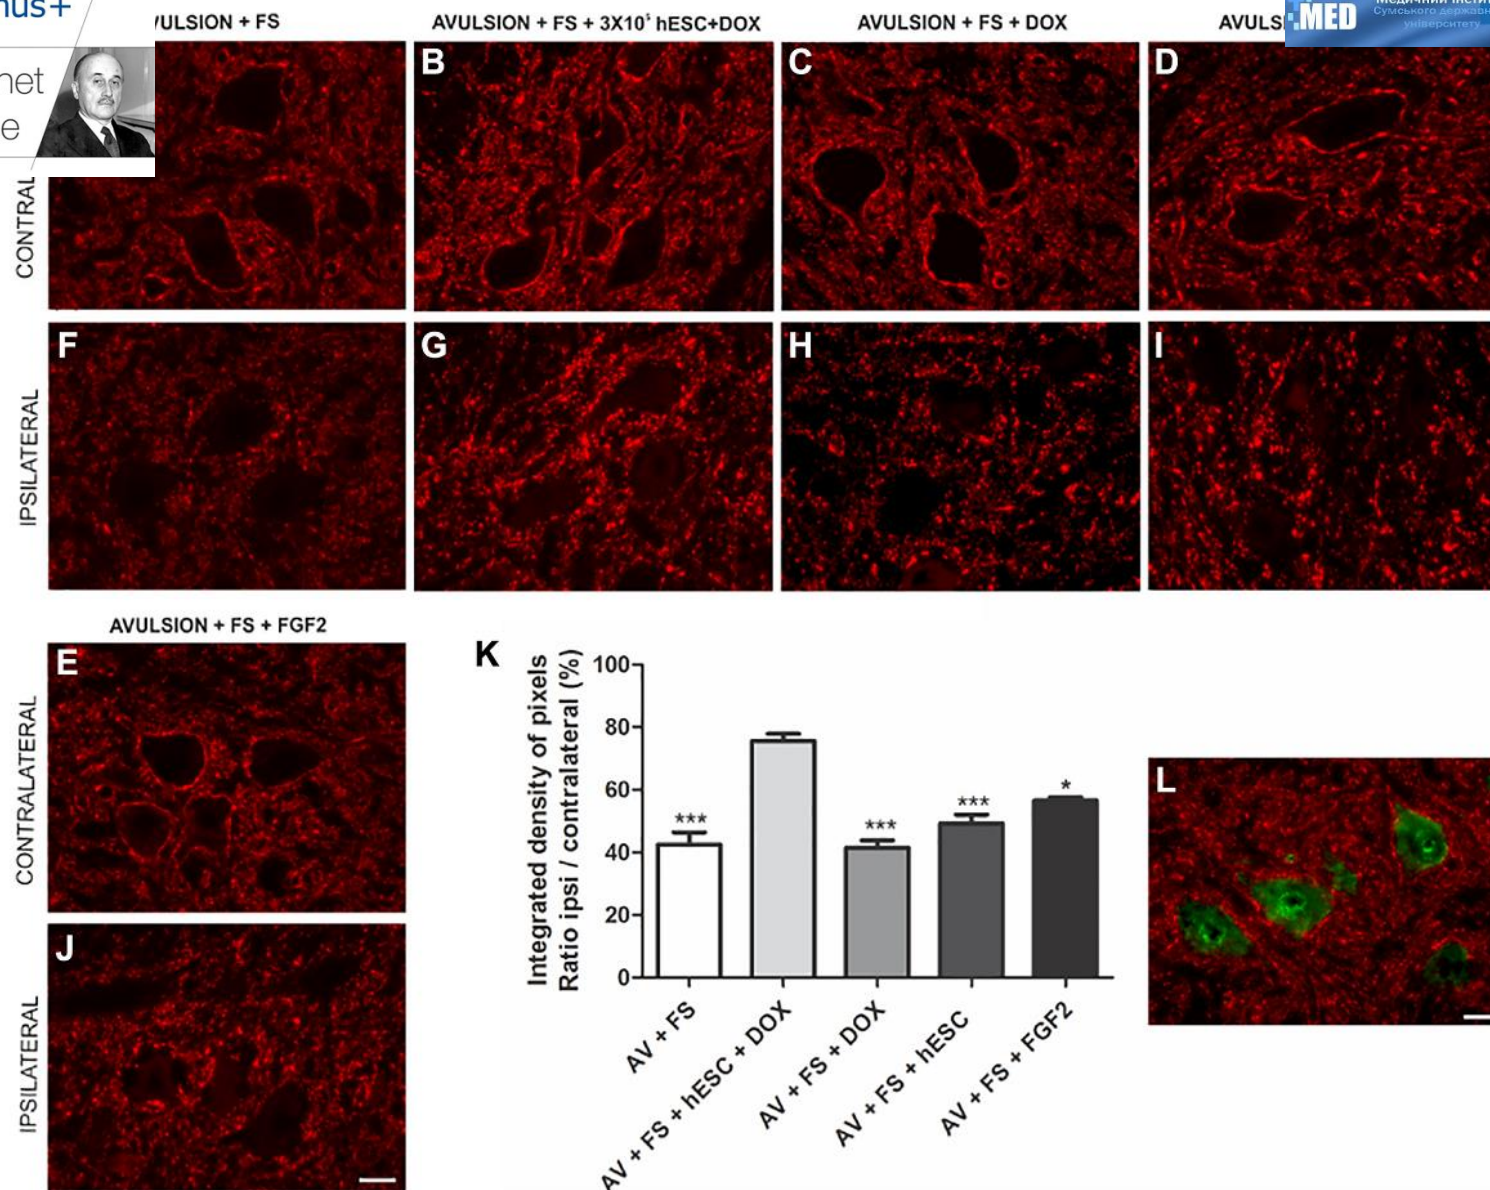

**Figure S2.** Inducible overexpression of the FGF2-GFP fusion in hESCs. Cells CCTL14 were transiently transfected with the vectors indicated. 1  $\mu$ M of DOX was added 24 hrs post-transfection and incubation continued for 48 hrs. Scale bar = 200  $\mu$ m.

Araujo, M. R., et al. (2017). "Transgenic human embryonic stem cells overexpressing FGF2 stimulate neuroprotection following spinal cord ventral root avulsion." Exp Neurol **294**: 45-57.

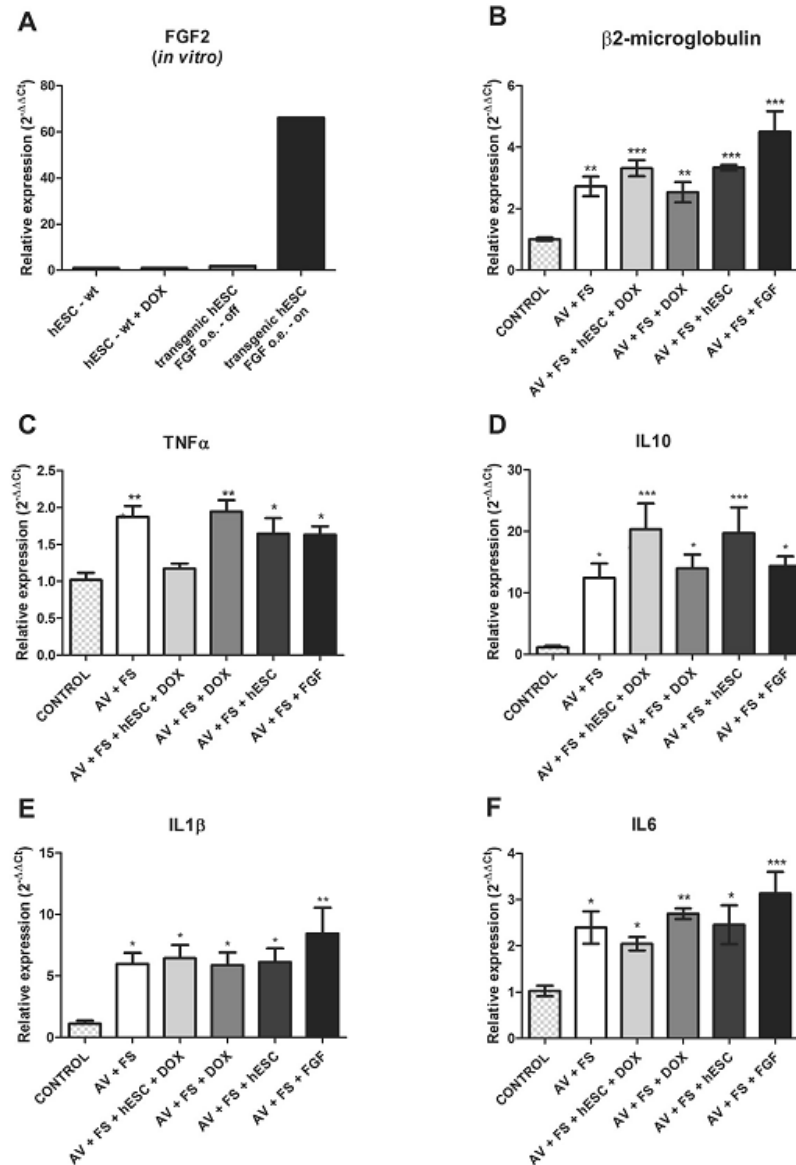

**Fig. 4.** Immunohistochemical analysis, 2 weeks after avulsion, in the ventral horn of the spinal cord labeled with anti-synaptophysin antibody. (A–E) Contralateral side to lesion. (F–I) Ipsilateral side to lesion. A significant preservation of synaptophysin immunoreactivity was observed in groups treated with hESC + DOX and FGF2. (J–K) Double immunolabeling of motoneurons present in the lamina IX of Rexed. Synaptophysin staining (red) is combined with NeuN (green). (L) Double immunolabeling of motoneurons present in the lamina IX of Rexed. Synaptophysin staining (red) is combined with NeuN (green). Scale bar = 50  $\mu$ m. AV: avulsion; FS: fibrin sealant; hESC: human embryonic stem cells; DOX: doxorubicin. For the references to color in this figure legend, the reader is referred to the web version of this article.

analysis, 2 weeks after avulsion, in the ventral horn of the spinal cord stained with anti-glial fibrillary acid protein (GFAP) antibody. (A–E) Contralateral side. (F–I) Ipsilateral side. (J) Ipsilateral side. (K) Bar graph indicates the ratio ipsi/contralateral of the integrated density of pixels in all groups. \* $p < 0.05$ ; \*\* $p < 0.01$ ; \*\*\* $p < 0.001$  relative to AV + FS + hESC + DOX. Data are expressed as mean  $\pm$  SE,  $n = 5$  per group. AV: avulsion; FS: fibrin sealant; hESC: human embryonic stem cells; DOX: doxycycline.

**Fig. 7.** Relative expression of basic fibroblast growth factor (FGF2) mRNA *in vitro*, and β2-microglobulin (β2m), tumor necrosis factor alpha (TNFα), interleukin 10 (IL10), interleukin 1β (IL1β) and interleukin 6 (IL6) *in vivo*. (A) The transcript levels for FGF2 were over 60 fold higher when hESC induced with doxycycline were used (transgenic hESC - FGF overexpression doxycycline exposed). In this case, transgenic hESC were compared to wild-type cells exposed or not to doxycycline (hESC wt and hESC + DOX, respectively). Transgenic d with doxycycline (FGF o.e. off) presented close to absent expression of FGF2 transcripts. (B) The group treated with FGF2 showed higher expression of β2m as compared AV + FS + DOX groups. (C) Significant decrease in TNFα expression in the group treated with stem cells overexpressing FGF2. (D) The groups treated with stem cells eny to higher expression of IL10. (E, F) The expression of these cytokines increased significantly in all treated groups compared to the control group, but there was no difference between the injured groups. \*p < 0.05, \*\*p < 0.01; \*\*\*p < 0.001 relative to control group (unlesioned spinal cord). (C) n = 5; (D) n = 5; (E) n = 5; (F) n = 5. AV: avulsion; FS: fibrin sealant; hESC: human embryonic stem cells; DOX: doxycycline.

**ЛИФЛЕТ** щодо можливостей в рамках напряму Жан Моне - **Завантажити**

Проекти передбачають участь **від одного і більше інститутцій** та розраховані **12 місяців, 24 місяці, 3 роки** (залежить від виду діяльності).

Основні **види діяльності** за напрямом:

- **ВИКЛАДАННЯ Й ДОСЛІДЖЕННЯ** ("Кафедри", "Модулі", "Центри досконалості")
- **ОБМІН ЗНАННЯМИ** ("Мережі" та "Проекти")
- **ПІДТРИМКА ДІЯЛЬНОСТІ АСОЦІАЦІЙ**

Детальніше по кожному окремому виду діяльності Жана Моне надано у відповідних розділах цього блоку та у Керівництві до програми Еразмус+ (Erasmus+ Programme Guide) за посиланнями: **англійською мовою** та **переклад українською мовою** (2 версія 2019 р.)

Конкурси проектів 2020 р. буде оголошено в жовтні 2019 р. з кінцевим терміном подання заявок до **лютого 2020 р.** Деталі про попередній конкурс на сайті - **за посиланням**

**Довідково:** Україна бере участь у програмі Жана Моне з 2001 року (деталі та інформація про попередні проекти Жана Моне **на сайті**). У 2014 році програма Жана Моне трансформувалась у напрям Жан Моне нової програми ЄС Еразмус+.

[Home](#)[About Erasmus+](#)[Opportunities](#)[Resources and Tools](#)[News and Events](#)[Contact](#)[Help](#)[> Opportunities](#)[> Organisations ▾](#)[> Individuals ▾](#)[> How to apply](#)[> Calls for tenders and  
proposals](#)

## How to apply

Under the Erasmus+ programme there are different opportunities for organisations and individuals. However, depending on the part of the programme you would like to apply for, the preparation and application procedure might differ. Let us guide you through the process:

### Before you apply:

### General Call for Proposals

Every year a General Call for Proposals is published, presenting opportunities for organisations and individuals active in the fields of education, training, youth and sport. In the Call you can find the objectives of the programme, an overview of the actions it is divided in, eligibility of potential actors, budget and duration of projects, and submission deadlines for each action. You can consult the latest Call for Proposals in our [Calls section](#). In addition,

## General Call for Proposals

Every year a General Call for Proposals is published, presenting opportunities for organisations and individuals active in the fields of education, training, youth and sport. In the Call you can find the objectives of the programme, an overview of the actions it is divided in, eligibility of potential actors, budget and duration of projects, and submission deadlines for each action. You can consult the latest Call for Proposals in our [Calls](#) section. In addition, some Specific Calls for Proposals are published at centralised level, through the website of the Education, Audiovisual and Culture Executive Agency (EACEA).

### Programme guide

A more detailed overview of the conditions and requirements of the actions you can apply for under the General Call can be found in the [Erasmus+ Programme Guide](#). It is the key document for anyone considering applying, and can be accessed online or downloaded as a PDF.

### Who can take part?

Erasmus+ is open to many individuals and organisations, although eligibility varies from one action to another and from one country to another. Countries that can take part are divided into two main categories:

- Programme countries: can fully take part in all the actions of the Erasmus+ programme.
- Partner countries: can take part in certain actions of the programme, subject to specific criteria or conditions.

For more information on eligible countries please consult the respective section in the [Erasmus+ Programme Guide](#).

### Register

Before you can apply for funding as an organisation you will first need to obtain an EU login. The [EU Login Authentication Service](#) (previously called ECAS) is a point for user authentication to a wide range of Commission information systems.

and to log-in to the [Participant Portal](#) with your EU Login account details and register your

to obtain your unique 9-digit Participant Identification Code (PIC).

Individual wanting to apply you will need to consult with the organisation you are part of (for example,

## PART D - Characteristics and relevance

### D.1. Why does your organisation wish to undertake this Action?

#### Summary of the proposal

- Brief write up of the key points.
- Background and rationale of the proposal.
- Objectives, activities, main outputs, outcomes and impact including indicators of achievement.

*Demonstrate evidence of academic added value, promotion of European Union studies and outline how the proposal impacts on the specific subject area of study at an international level. Please outline to what extent the proposal fosters the development of existing and new teaching and debating activities (including new methodologies, tools and technologies), how it demonstrates evidence of academic added value, how it promotes European Union studies at the host institution and gives greater visibility to this field of study at a national level. Please also provide a short overview of the state of play of EU studies in your Faculty/Institution/Country and indicate to what extent your project responds to an identified need to develop this field of study (Recommended 4000 characters).*

## E.5. Operational capacity: Skills and expertise of key staff involved in the project

*Special attention should be paid to the quality (excellence) of the academic profile in the specific field of European Union studies. Please add lines as necessary.*

+

SKILLS AND EXPERTISE OF KEY STAFF MEMBERS	
Please provide the names of the key staff members and indicate for each his/her expertise relevant to the implementation of the project and the role to be undertaken in the project	
Name <sup>1</sup>	Summary of relevant skills and experience

□

## ACADEMIC PROFILE OF KEY STAFF MEMBERS

ry information should be provided for each academic key staff member, including
